JBOSS

Work History

#1. BRAVURA SOLUTIONS LLP.

February 2018 – Present

1.1) Project name: SONATA

Brief Description:

Sonata is a backend Software product for all financial services, which provide one stop solution for all financial problem. Sonata is a rich tool for Superannuation domain & US Retirement Benefits administration plan which is part of Investment Banking domain. Sonata manages all your asset, transaction, and financial investment.

Team Size: 10

Role: Full stack developer (Angular6+ and Java rest api's)

Technologies:

Java Rest services, Angular 6+ (for web), Web-components, SQLB framework (Self developed framework), Oracle, Flex, Bootstrap4 etc.

Responsibilities: -

- ⌚ Created Angular based web application for various clients using Angular 4+ and java rest api's.
- ⌚ Developed role based Angular pages.
- ⌚ JWT securities and filters
- ⌚ Developed many functionalities related to business prospective like related to life, wealth management, trading areas etc.
- ⌚ Developed web-components based angular web pages.
- ⌚ Worked on various third party api's like morning star, investment forecast, maps, location etc.

1.2) Project name: STANZA

Brief Description:

Stanza is Angular and Python natural language analysis package. It contains tools, which can be used in a pipeline, to convert a string containing human language text into lists of sentences and words, to generate base forms of those words, their parts of speech and morphological features, to give a syntactic structure dependency parse, and to recognize named entities. The toolkit is designed to be parallel among more than 60 languages, using the universal dependencies formalism.

Stanza is built with highly accurate neural network components that also enable efficient training and evaluation with your own annotated data. The modules are built on top of the Pytorch library. You will get much faster performance if you run this system on a GPU-enabled machine.

Team Size: 4

Role: Full stack developer (Angular6+ developer)

Technologies:

Java Rest services, Angular 6+, Web-components, Oracle, spring boot, Micronaut etc.

Responsibilities: -

- ⌚ Created Angular based web application from scratch.
- ⌚ Developed role based Angular pages.
- ⌚ JWT securities and filters
- ⌚ Consumed the NLP api's.
- ⌚ Developed web-components based angular web pages.

#2. KMG INFOTECH LTD.

February 2016 – February 2018

2.1) Project name: MedPrimeEMR

Brief Description:

Electronic medical record (EMR) systems, defined as an electronic record of health-related information on an individual that can be created, gathered, managed, and consulted by authorized clinicians and staff within one health care organization. EMR have the potential to provide substantial benefits to physicians, clinic practices, and health care organizations. These systems can facilitate workflow and improve the quality of patient care and patient safety. This system makes the entire process of patient record keeping easier, more accurate and comprehensive, and more efficient.

Team Size: 6

Role: Full stack developer (Jsp, Jstl and SpringMVC rest api's)

Technologies:

Java JSON services, Mantis, Spring boot, Jsp, Jstl, JavaScript, jQuery, Ajax, MySQL, Flex, Bootstrap4 etc.

2.2) Project name: MYMedPrime - Patient portal

Brief Description:

Medical practice management software (PMS) is a category of health care software that deals with the day-to-day operations of a medical practice. Such software frequently allows users to capture patient demo graphics, schedule appointments, maintain lists of insurance payers, perform billing tasks, and generate reports.

Team Size: 4

Role: Full stack developer (Jsp, Jstl and SpringMVC rest api's)

Technologies:

Java JSON services, SpringMVC, Jsp, Jstl, JavaScript, jQuery, Ajax, MySQL, Flex, Bootstrap4 etc.

2.3) Project name: WHATMY (WEBSITE + IONIC BASED ANDROID APP)

Brief Description:

What My is basically an e-commerce type of hybrid application , here you can share the product from amazon and these shared product will be listed on our application with their details like price ,size, color etc. and later you can share these product to the person which is in your contacts detail. Another feature is you can also manually add some product with these details and able to list these products with their current location and whenever you shared the product location will also share corresponding to their information.

Team Size: 4

Role: Full stack developer (SpringMVC rest api's, Angular 2+ and ionic 2+)

Technologies:

Java JSON services, SpringMVC rest service, Ionic

2+, Angular 2+, Typescript, MySQL, Flex, Bootstrap4 etc.

Education

🕒 Bachelor of Engineering in Computer Science (2012-2016) from UPTU with percentage - 79%.

🕒 Completed **senior secondary** with 68% from BSEB, **Patna** Bihar.

🕒 Completed **High school** with 71% from BSEB, **Sitamarhi** Bihar.

**Personal
Details**

🕒 Name: Himanshu Kumar

🕒 DOB: 21 feb,1993

🕒 S/o: Ramji Mandal

🕒 Language: Hindi, English

Declaration
